MEET THE PACKAGING SOLUTIONS TAILORED YOUR NEEDS

ABOUT US

Mostpack is a leading company in the field of flexible packaging and consumable materials, prioritizing quality, fast delivery times, and a customer-focused approach.

Its product range includes a wide variety of packaging materials such as OPP, CPP, PE Bags and Rolls, PE Shrink Film, POF Shrink Film, Doypack Pouches, Bubble Wrap Bags and Rolls, Nonwoven (Spunbond Fabric) Shopping Bags, Adhesive Tapes, Stretch Film, and Edge Protectors. Mostpack aims to enhance quality, safety, and efficiency in packaging processes.

Thanks to its strategic location in Istanbul and robust operational network, the company offers fast, flexible, and tailored solutions to both domestic and international customers.

Delivering high quality, on-time and complete orders is Mostpack's top priority—not only supplying products, but also building trust and long-term partnerships.

PLASTIC PRODUCTS

I PLASTIC BAG

It is a packaging solution preferred in various industries due to its wide range of applications, durable and flexible structure. It protects products and provides ease of transport.

- Durable and flexible structure
- Lightweight and economical
- Available in various sizes and thicknesses

I VEGETABLE - FRUIT BAGS

Thanks to its breathable structure, it preserves the freshness of fresh products and allows air circulation. It is commonly used in markets and greengrocers.

- Breathable, preserves freshness
- Thin and lightweight material
- Food contact compliant material

■ BREAD BAGS

By balancing moisture, it helps keep bread and bakery products fresh. With its hygienic and durable structure, it is used from bakeries to markets.

- Balances moisture, preserves freshness
- Hygienic and durable
- Available in transparent or kraft-coated options

■ SHIPPING BAGS

Made from tear-resistant material, it offers ease and security in transportation. It is especially preferred in the e-commerce sector.

- Tear-resistant
- Lightweight and easy to carry
- Provides secure transportation

■ TEXTILE BAGS

It protects fabrics and garments from wrinkling. Offers solutions for different needs with transparent or opaque options.

- Prevents wrinkling
- Transparent and opaque options
- Durable material

■ GARBAGE BAGS

Designed for hygienic waste collection in residential and industrial areas. Available in various thicknesses and sizes.

- Available in different thickness and size options
- Durable and tear-resistant
- Suitable for domestic and industrial use

■ SECURITY BAGS

Provides secure transportation of valuable documents and products with a special tamper-evident locking system.

- Single-use locking system
- Leaves a visible mark when opened
- Secure for valuable items

■ FLOWER BAGS

With its transparent and lightweight structure, it protects flowers while creating an aesthetic presentation. Preferred by florists.

- Transparent and decorative
- Lightweight and durable
- Provides easy carrying

■ DOYPACK POUCH

An ideal packaging solution for product presentation and protection in the food, cosmetics, and various other industries. Its modern appearance makes it stand out on shelves.

- Provides organized display with its stand-up bottom
- Lightweight, durable, and leak-proof structure
- Available in various sizes and material options
- Optional OPP window feature allows visibility of the contents

■ NONWOVEN (SPUNBOND FABRIC) SHOPPING BAG

An eco-friendly and durable carrying solution preferred for promotions, trade shows, retail, and everyday use.

- Tear-resistant nonwoven fabric structure
- Reusable and cost-effective
- Available in various sizes and color options

Optional OPP laminated glossy surface for water resistance and enhanced visual appeal

■ CRATE SHEET

Thin plastic sheet films placed over plastic crates that protect products from external factors and facilitate presentation.

- Protects and separates the product
- Transparent and durable structure
- Commonly used in vegetable, fruit, and food crates

FILM AND SHRINK PRODUCTS

■ PE SHRINK FILM

A flexible and durable packaging film used to tightly wrap products and secure them on pallets.

- High shrinkage rate
- Wraps products securely
- Ideal for palletizing

■ POF SHRINK FILM

With its glossy and transparent structure, it provides an aesthetic presentation and is frequently preferred in food and cosmetic packaging.

- Glossy and durable surface
- Transparent, aesthetic presentation
- Suitable for food and cosmetics

■ STRETCH FILMS

A flexible packaging material that can be used manually or with machines, protecting and securing products from external factors.

- Flexible and strong structure
- Secures and protects products
- Available in manual and machine types

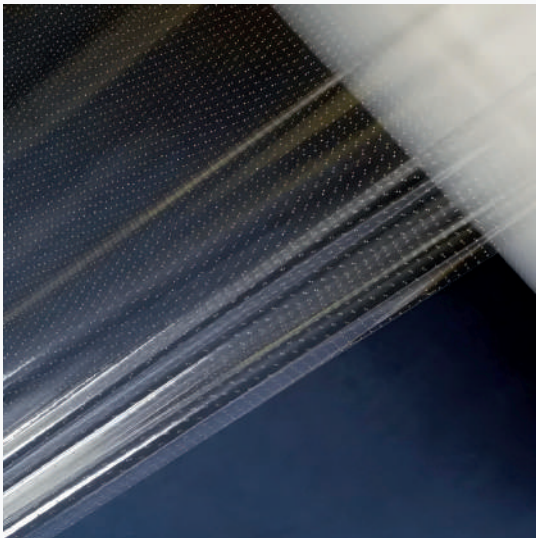

■ AUTOMATIC PACKAGING ROLLS

Large-sized packaging rolls used with automatic machines in high-volume production lines.

- Suitable for high-volume production
- Saves time
- Ideal for machine use

■ MICRO-PERFORATED PACKAGING

A special packaging film with micro-perforations that allows products to breathe and extends their freshness.

- Provides air circulation
- Extends product freshness
- Prevents mold growth

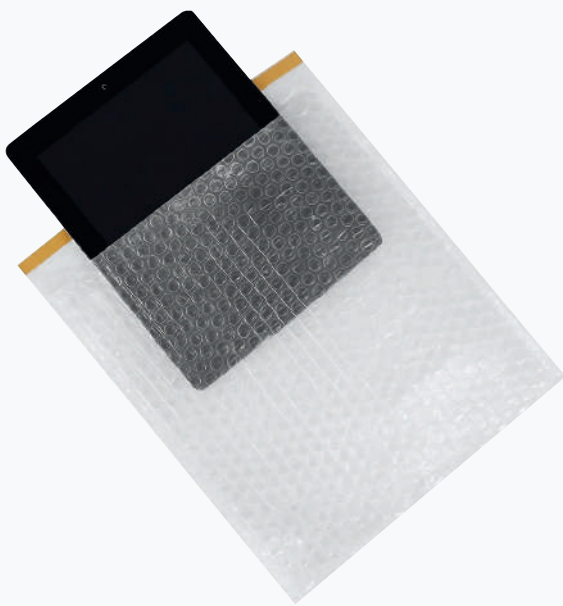

BUBBLE MAILER

It has a bubble protective layer that safeguards small, delicate products against impacts. Ideal packaging for shipping.

- High protection against impacts
- Lightweight and easy to use
- Perfect for small and delicate products

■ BUBBLE BAG

A ready-to-use bag-shaped packaging product with a bubble structure that protects fragile and delicate items against impacts.

- Impact-absorbing bubble inner surface
- Ideal protection for delicate products
- Easy and practical packaging solution

I BUBBLE WRAP ROLL

Bubble wrap rolls that protect fragile products against impacts.

- Maximum shock absorption
- Protection for delicate items
- Easy-to-use roll format

PROTECTIVE MATERIALS

I CORNER PROTECTOR

Provides edge and corner protection to prevent damage during transportation. Lightweight and easy to apply.

- Edge and corner protection
- Lightweight and durable
- Easy to apply

I HONEYCOMB PROTECTIVE SHIPPING BAG

Provides safe transportation of fragile products by absorbing impacts with its special honeycomb structure.

- Soft honeycomb structure
- Absorbs shocks
- Ideal for fragile products

PAPER / CARDBOARD PRODUCTS

I KRAFT PAPER BAG

An eco-friendly and recyclable packaging solution that is both aesthetic and durable.

- Recyclable and environmentally friendly
- Durable and sturdy structure
- Aesthetic and natural appearance

I CARDBOARD BOX

Durable and made from recyclable materials, these boxes are ideal for shipping and storage in various sizes.

- Durable and sturdy construction
- Recyclable
- Available in different size options

I CARDBOARD LABEL

Made from cardboard or specially textured paper, attached to the product with string or plastic fasteners. Reflects brand identity.

- Durable cardboard material
- Attached with string or plastic fasteners
- Stylish and eye-catching design

I ADHESIVE LABEL

With its self-adhesive surface, it can be easily applied to products, packaging, or fabric. Offers practical and quick use.

- Self-adhesive surface
- Easy and fast application
- Ideal for price, barcode, and information

I PAPER CUP

Disposable hygienic cardboard cups suitable for hot and cold beverages.

- Heat insulated
- Disposable and hygienic
- Suitable for hot and cold drinks

■ TAPE

PACKING TAPE

A strong adhesive and durable tape type used for securely sealing cardboard boxes.

- Strong adhesion
- Available in various sizes and colors
- Easy to apply

KRAFT TAPE

Especially preferred due to its recyclability.
